

DANIEL MÜLLER-SCHOTT in Vancouver , Shaughnessy Elementary School , November 2009

LETTERS FOR DANIEL

Dear Daniel,

You are a great cellist! You have great talent and I wish to be like you some day. I play the piano and the alto saxophone. I'm sure everyone enjoyed you being at our school!

Sincerely, Maia

Dear Daniel Muller Schott,

Thank you so much for coming to Shaughnessy School and performing for us. We all thought that it was amazing to hear you play your cello! The music was very entertaining and beautiful. The rich, dark sound that came from the instrument was amazing! I hope that you continue visiting other schools so that they can experience your beautiful music too.

Thanks again! Jacqueline

Dear Mr. Muller-Schott,

Thank you for sparing your precious time and coming to our school to teach us. It was a pleasure watching you play cello. We all love "The Swan" by Camille Sain-Saen as well. We are also young cello and violin players and we hope that we can play as well as you in the future. When you were playing 'The Swan', it suddenly made our heads relaxed and calm. The teachers in Shaughnessy Elementary School praise not only your cello skills, but your appearance!! ©

Sincerely, Emily Michelle ; CarolineT

Emily: I also saw you at Vancouver Academy of Music teacher other students and it was fastastic!

Dear Daniel Muller Schott,

I think you are a really great cellist and it was a real treat for you to come to our school to play for us. It's wonderful that you inspire so many young musicians. I play the piano and the Tenor Saxophone. The cello seems like a really fun instrument to play too. Fm sure that lots of students are now playing music thanks to you! I hope you continue to play and keep on intriguing people to play and instrument.

Thank you for playing for us, we all enjoyed it. Hayley

Dear Daniel

I had a great time at the performance. You're truly a fantastic cellist. I'm sure everyone loved it just as much as me!!! I hope you visit our school some time in the future.

Yours Truly, Dora
